OCEXAMINER Claims Editing

WHAT WE SEE

Healthcare is a **complex puzzle** of clinical service delivery, information processing and financial management. Administrative and Clinical personnel are solving problems specific to them; However, they may not be aware of their impact on the rest of the organization.

WHAT WE DO

We help hospitals **put the pieces together**. Our systems bring your clinical information together with your financial records to identify **opportunities for bottom line improvement**. In addition, we help you establish best practices, a process and methodology developed out of our many hospital engagements.

WHO ARE WE ?

Omega Technology Solutions is an organization of over 80 professionals with healthcare, accounting and technology experience. Most of our staff are certified as CPA's, CPAT, RN's, PMPS, CPC, and CPCH. We have used that accumulated experience and complimentary knowledge to develop and provide technology solutions and services to hundreds of hospitals over our decade in this business.

WHO TRUSTS US?

OMEGA TECHNOLOGY SOLUTIONS, LLC

We value our relationships with our clients and consider them to be a part of our family. Throughout the country, we have developed successful business relationships and continue opening new doors each day. Here are some of the organizations who have entrusted us with their business:

- Cambridge Health Alliance
- Cape Cod & Falmouth Hospitals
- Carolinas Healthcare System
- El Camino Hospital
- Lodi Memorial Hospital
- LRG Healthcare
- Mt. Sinai Medical Center - Miami
- Northern Michigan Regional Hospital
- Parrish Medical Center
- Southern New Hampshire Medical Center
- Thomas Hospital
- Wuesthoff Hospital System

*"If I were to go to another facility
I would bring them there to
assist me in a heart beat"*

Tim Skeldon
Chief Financial Officer
Parrish Medical Center

Just one example of our system that was actually developed out of our world renowned **Lost Charge Recovery Services Engagements**

is the **ChargeMASTER™** Maintenance System.

We've developed the **ChargeMASTER™** system to help you pinpoint the items that are missing or out-of-date in your CDM. Our coding and compliance experts update the system as regulations change to capture any bulletins from CMS — once you've gotten your CDM up-to-date, you can monitor any changes and make them at your convenience. This web-based solution hosted by Omega Technology Solutions is available 24 x 7 x 365, and is accessed via a password-protected virtual private network; so your data is secure. Additionally, you maintain control of your CDM **at all times** — you make the updates that you want, when you want; **ChargeMASTER™** simply reports on the changes since your last analysis. **ChargeMASTER™** is an annual or multi-year subscription service and costs less than one full-time staff member.

ChargeMASTER™ is a comprehensive resource for hospital ChargeMaster and MIS staffs. Since it is a web-based application, **ChargeMASTER™** is available to analyze your CDM any time you need it. The system can instantly pinpoint items that need to be updated for regulatory compliance and identify new or revised codes that will increase reimbursement yields.

ChargeMASTER™ contains 3 modules:

- **Alerts:** Invalid/Incorrect HCPC/CPT/Revenue Codes, Fraud and Abuse Alerts
- **Modeling:** Companion Code Models, CPT Department Models
- **Price:** Uniform pricing issues and charges that are below OPPS payment rates

In addition, **ChargeMASTER™** provides information to assist the user in identifying possible solutions. Here's how it works: You submit your CDM for review via a password-protected, encrypted Internet VPN. You receive back a comprehensive report.

YOUR REPORT :

- Shows you how/where to immediately bring your CDM into regulatory compliance.
- Identifies coding errors that would cause claims to be rejected.
- Identifies linked (companion) codes that are missing from your CDM.
- Identifies charges that are below OPPS rates.
- Shows you how to correct errors so they do not recur.
- Frees CDM staff from tedious research and compliance responsibilities.
